premium sets of adhesive plasters

Premium sets of adhesive plasters are designed for specific situations in everyday life. SENSITIVE is dedicated to the most demanding and particularly sensitive skin. It uses a new, pioneering silicone adhesive formula. The specially designed slim S.O.S. package fits easily into any handbag, even the smallest ones, and the practical FABRIplast / NONVIplast plasters for cutting with absorbent pad are the only ones on the market to come with scissors.

Present in any situation, always with you and your loved ones.

SENSITIVE

set of adhesive plasters for sensitive skin

NEW FORMULA - SILICONE ADHESIVE

In order to meet the requirements of the most demanding, exposed to abrasions and irritation delicate skin, a set of SENSITIVE plasters has been developed with a new silicone formula. The adhesive is adapted to the characteristics of sensitive skin, does not cause allergic reactions. It ensures that you will never feel pain when removing the dressing.

novelty
silicone
adhesive

IMMEDIATE ADHESION TO THE SKIN AT THE APPLICATION SITE

lower surface tension of the applied adhesive in comparison to others available on the market ensures immediate adhesion to uneven skin surface allowing to maintain adhesion during the whole period of application

SUITABLE FOR SENSITIVE SKINS, PRONE TO DAMAGE AND IRRITATION

the homogeneous, cohesive structure of the silicone adhesive does not pull the skin or hair when peeling the dressing off, and allows reapplication without reducing the adhesive strength

100% COMFORT AND SAFETY FOR THE USER - PAIN REDUCTION DURING DRESSING CHANGE

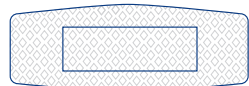

the high cohesiveness of the silicone adhesive allows painless removal of the plaster without damaging the epidermal surface

non-adherent absorbent pad for painless dressing changes, acts as a barrier to contamination

THE SET INCLUDES:

7,6 cm x 1,9 cm x 8

4,1 cm x 10,2 cm x 4

12 pcs

SENSITIVE

Set of SENSITIVE plasters is intended for sensitive skin prone to irritation. The use of one of the most delicate adhesives on the market is ideal for painless dressing of injuries on hairy skin, especially in the elderly and children. The thin, breathable structure of the plasters ensures proper conditions promoting wound healing processes.

Correction of an application

Korekcja aplikacji

possibility to correct the application of the plaster without the risk of damage, skin irritation and pain

Safe

Bezpieczny

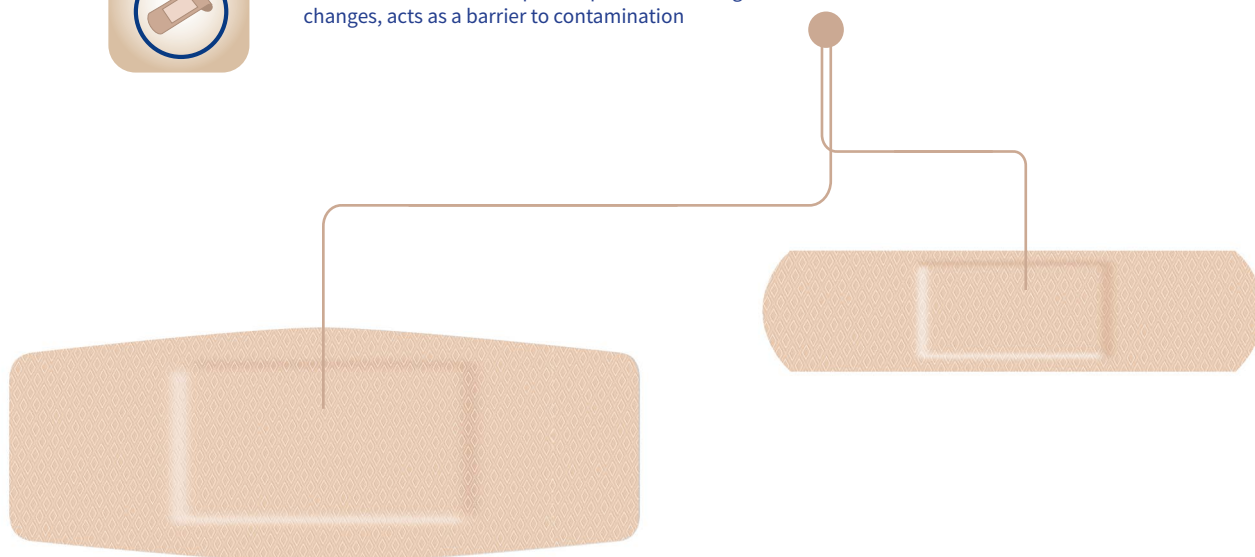

non-adherent absorbent pad for painless dressing changes, acts as a barrier to contamination

Hypoallergenic

Hipoalergiczne

friendly to people prone to allergies, gentle for sensitive skins prone to irritation

S.O.S

Specially designed set of adhesive plasters in a narrow package will fit easily into even the smallest handbag or backpack. The universal size and shape of the plasters allows for protecting the most common superficial injuries, and the flexible material ensures proper adjustment to the shape of the body without restricting movements.

THE SET INCLUDES:

7,2 cm x 1,9 cm x8

8 pcs

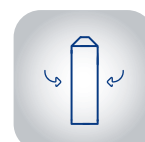

Must have for every handbag

Must have każdej torebki

handy and practical set of plasters for every situation, to protect even the smallest cuts and abrasions

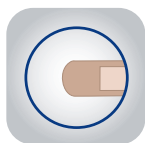

Narrow package Opakowanie slim

handy, space-saving package ensures that first aid can be given for minor cuts or abrasions in any situation

Rounded edges

Zaokrąglone brzegi

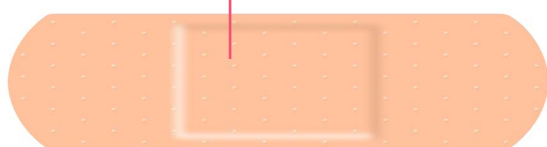

rounded and thin edges reduce the risk of the dressing peeling off the application site

Safe Bezpieczny

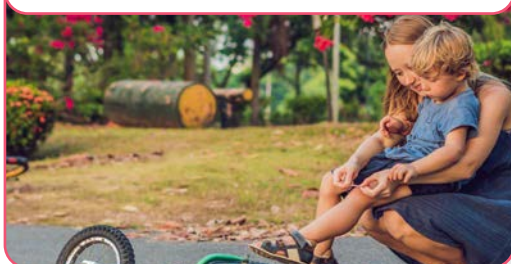

non-adherent absorbent pad for painless dressing changes, acts as a barrier to contamination

Narrow package

MUST HAVE FOR EVERY HANDBAG

When planning a trip, I often forgot about the small dressings that are always worth having with me ready to use.

NARROW PACKAGE

This handy little pack is perfect for parties and meetings. Worth having in your handbag in case of need.

ROUNDED EDGES

Plaster should not peel off by itself. The rounded edges of the dressing are a good idea, for better adhesion and comfort.

This is by far the most frequently chosen form of plasters. Thanks to the possibility of individual adjustment of the size of the plaster to the size of the injury.

This practical plaster for cutting with absorbent pad is the only one on the market to come with scissors that allow you to adjust the size of the dressing to the size of the injury or abrasion at any time and in any situation. The flexible material ensures proper adjustment to the shape of the body, and the non-adherent absorbent pad eliminates pain when changing the dressing.

**The only
one on
the market!**

SET: PLASTER + SCISSORS

THE SET INCLUDES:

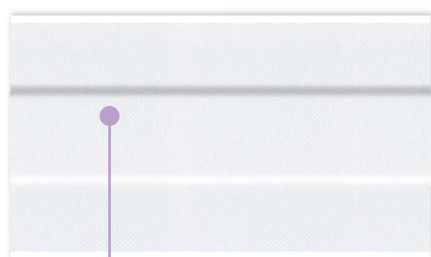

1 m x 6 cm x1

x1

1 pc.

non-adherent absorbent pad for painless dressing changes, acts as a barrier to contamination

NONVIplast

NONVIplast with a delicate non-woven base allows the skin to breathe freely and protects against pollution and dirt. It is especially recommended for wounds located in sensitive areas (e.g. neck, face).

Practical Praktyczny

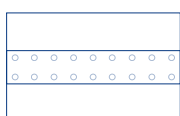

size of the plaster can be individually adjusted to the size of the cut or injury

Gentle Delikatny

soft, non-woven base ensures vapour permeability, allowing the skin to breathe

THE SET INCLUDES:

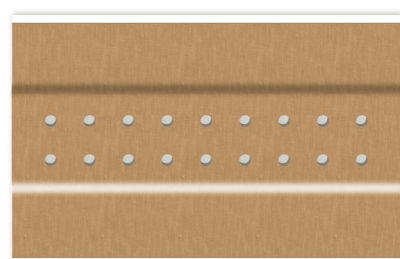

1 m x 6 cm x1

x1

1 pc.

non-adherent absorbent pad for painless dressing changes, acts as a barrier to contamination

FABRIplast

FABRIplast with a vapor-permeable fabric base resistant to external damage is perfect for dressing cuts and abrasions on elbows, knees and other places susceptible to injuries.

Practical Praktyczny

size of the plaster can be individually adjusted to the size of the cut or injury

Durable Wytrzymały

strong, cotton base ensures high adhesion and close adherence to the skin

adhesive tapes

Classic adhesive tapes on a spool are designed for fixing dressings and bandages to prevent them from moving. The hypoallergenic adhesive applied to the non-woven or fabric base reduces the risk of allergic reactions and irritations, especially on sensitive and susceptible skin. The cap on the spool protects the adhesive tape from external damage, dirt and contact with water.

Indispensable in every situation.

adhesive fabric tape

SENSIplast

adhesive non-woven tape

SOFTplast

SENSIplast

adhesive fabric tape

SENSIplast

Durable and strong adhesive tape on a fabric base with high adhesiveness. It adapts to the shape of the body and ensures high wearing comfort. The structure of the fabric allows adequate air permeability and does not lead to skin maceration at the application site.

Durable Wyttrzymały

strong fabric base ensures high adhesion and close adherence to the skin, ensuring full wearing comfort

thin, breathable structure of the adhesive tapes provides appropriate conditions conducive to wound healing processes

Breathable Oddychające

Use of serrated edges makes it possible to divide the adhesive tape by hand without the use of scissors. Guaranteed to attach securely to the skin.

SOFTplast

adhesive non-woven tape

SOFTplast

Soft adhesive tape on a non-woven base with exceptional softness to the skin. It adapts to the shape of the body and ensures full comfort of use. The microporous structure of the non-woven fabric enables adequate air permeability and does not lead to skin maceration at the application site.

Gentle Delikatny

soft, non-woven base ensures proper air permeability allowing the skin to breathe freely

friendly to people prone to allergies, gentle for sensitive skins prone to irritation

Hypoallergenic Hipoalergiczne

The material used makes it possible to divide the adhesive tape by hand without the use of scissors. The surface of the adhesive tape can be written on.
